INDEX
to the 1980 Bulletin

Abstract words, verbal learning tasks and, 107–110
Active comprehension, reading and, 82–84
Adolescent cognitive development, learning disability and, 79–92
Alphabet, directionality and, 277–82
Arrow, directionality and, 277–82
Auditory problems in dyslexics (Johnson), 268–75

Bender's group (organizational deficit children), 234–35
Benton, Arthur L., history of dyslexia and, 10–23
Black, Kathryn Norcross, hereditary factors in language acquisition and, 134–140
Bloom, Lois, language development/disorders and, 115–32
Book reviews, 285–310
Brain growth, cognitive development and, 46–61

Children: directionality and, 277–82; Dutch WISC/WISC-R studies and, 94–95; environmental noise/load levels and, 40–45; language development/disorders and learning disabilities in, 115–32; language disability case study (Jansky), 252–67; language-disabled, speech of, 141–50; language impairment research and, 153–66; patterning/organizational deficits and 227–38; phonetic cues, spelling/parsing/reading and, 209–223; Piaget's theory and, 29–40; written language disorders and, 240–51
Cicci, Regina, written language disorders and, 240–51
Cluttering, 231–33
Cognitive competence: child's environments/Piaget's theory and, 29–40, 42; noise factor and, 40–41; thought process load and, 43–45
Cognitive development: brain development/readiness and, 46–48; brain properties and, 48–49; cortical changes in neural networks and, 49–51; language/logic/reading and, 59–61; thought/language and, 54–59; vision/hearing/language and components of reading, 51–54
Cognitive factors in language impaired children, 157–59
Cognitive styles, reading and, 63–77
Conceptual tempo (reflection-impulsivity) cognitive style, 72–75
Concrete words, verbal learning tasks and 107–110
Constricted vs. flexible control (cognitive style), 75–76
Content/word identification and, 199–205
Cortical changes in neural networks, 49–51
Cryptanalysis, reading and, 184–93

Degraded graphic data, 205–207
de Hirsch, Katrina, patterning/organizational deficits and, 227–38
Differential diagnosis (organizational deficits), 234–37
Direction, sense of. *See* Sense of direction
Duane, Drake D., presentation of Orton Award, 1–4
Dyslexia: history of concept of, 10–23; persistent auditory disorders and, 268–75

Environments of competence, 40–45
Epstein, Herman T., biological bases of cognitive development and, 46–61

Field independence-dependence cognitive style, 69–72
Flexible control vs. constricted (cognitive style), 75–76

Gallagher, J. Roswell, Samuel T. Orton Award for 1979 presented to, 1, 5–6
Gough, Philip B., learning to read and, 179–94
Graphic data, degrading of, 205–207

Handwriting, 241–43
Hearing, brain growth/vocabulary and, 52, 53–54
Hereditary factors in language acquitition, 134–40

Hillinger, Michael L., learning to read and, 179–94

Image/sentence generation stage (verbal learning), 103–104
Information gathering, cognitive development, (adolescent) and, 85–88
Instruction effects on verbal learning, 100–110

Jansky, Jeanette: language disability case study by, 252–67; patterning/organizational deficits and, 227–38
Johnson, Doris J., persistent auditory disorders and, 268–75

Kogan, Nathan, reading performance/cogitive styles and, 63–77

Language: brain growth and, 52–61; development/disorders, learning disabilities and, 115–32; impaired development research and, 153–66; oral, intra-linguistic functions and, 81–82; perception/reading and, 170–77

Language acquisition, hereditary factors in, 134–40
Language-disabled children: patterning/organizational deficits and, 227–38; research and, 153–66; speech of, 141–50; writing and, 240–51
Language processing organizational problems, 230
Lateralization, ambiguous, 229–30
Learning disabilities: adolescent cognitive development and, 79–92; case study of (Jansky), 252–67; cognitive abilities and, 94–110; language development/disorders and, 115–32; patterning/organizational deficits and, 227–38; perception/reading/language and, 170–77
Leonard, Laurence B., speech of language disabled children and, 141–50
Ludlow, Christy L., language development research and, 153–66

Neural network, cortical changes in, 49–51
Neurological bases: of developmental language disorders, 163–65; of language behavior, 160–62
Noise, child's working environment and, 40–41

Oral language, intra-linguistic function and, 81–82. *See also* Language
Organizational deficits, language/learning disabilities and, 227–38
Orton Award for 1979, 1–6
Orton, Samuel T.: University of Iowa memorial to, 7–9; work of, reviewed, 16–19

Paired-associated tasks, 107–110
Paired-associate learning, reading and, 181–84
Parsing, phonetic cues and, 215–16
Patterning deficits, 227–38
Perception, language/reading and, 170–77
Perceptual factors in language impaired children, 157–59
Perceptual instability, 230–31
Perfetti, Charles A., verbal coding/reading and, 197–207
Persistent auditory disorders, 268–75
Phonology, language-disabled children and, 145–46
Piaget, J., research and theory of, 29–40, 42
Pragmatics, language-disabled children and, 148–49
Prosody, phonetic cues and, 218–23

Readiness, brain growth and, 46–48
Reading: active comprehension and, 82–84; cognitive styles and performance in, 63–77; hereditary factors and, 139–40; language/perception and, 171–77; learning of, 179–94; phonetic cues/prosody and, 222–23; readiness, 46–48; reading/reading failure/verbal coding efficiency and, 197–207; vision/hearing/language and, 51–54
Reflection-impulsivity cognitive style, 72–75
Research in language development, 153–66
Reviews, 285–310

Samuel T. Orton Award for 1979, presented to J. R. Gallagher, 1–6. *See also* Orton, Samuel T.
Schreiber, Peter, use of phonetic cues, 209–223
Semantics, language-disabled children and, 146–47
Sense of direction, alphabet/arrow and, 277–82
Sentence/image generation stage (verbal learning), 103–104
Single-word subjects, phonetic cues and, 218–21
Social awareness, adolescent cognitive development and, 84–85
Spatial orientation, alphabet/arrow and, 277–82

Speech: of language-disabled children, 141–50; reading and, 175–77
Spelling, phonetic cues and, 211–15; written language disorders and, 244–247
Stewart, Mark A., University of Iowa Orton memorial and, 7–9
Stone, C. Addison, learning disability/adolescent cognitive development and, 79–92
Subclassification system, language impaired children, 155–57
Subject noun phrases, phonetic cues and, 216–17
Subtest scatter (WISC-R), 95–100
Syntax, language-disabled children and, 147–48

Tallal, Paula, language/reading/perception and, 170–77
Task difficulty (visual imagery/verbal-sequential conditions), 104–107
Tasks: paired-associated, with concrete and abstract words, 107–110; spelling/parsing, 210–11
Therapy, organizational deficit children and, 237
Thinking skills, adolescent cognitive development and, 85–88
Thought, language and, 54–59
Thought process load, cognitive competence and, 43–45

University of Iowa, Orton memorial at, 7–9

van den Bos, Kees P., learning disability/cognitive abilities and, 94–110
Verbal coding, reading/reading failure and, 197–207
Verbal learning, instructional effects on, 100–110
Vision, brain growth and, 51–52, 53

Waites, Lucius, sense of direction and, 277–82
White, Sheldon H., cognitive competence and, 29–45
WISC/WISC-R studies, 94–110
Word identification, context and, 199–205
Written language disorders, 240–51

C 20
